

Rai Corporation

Audio Technician

Job Location

NY - New York

Job Description

Rai Corporation produces and distributes Italian radio and television programs, news programs, and news segments for Rai in Italy and for the 24-hour Rai International Channel, which broadcasts worldwide via satellite.

In this role you will be responsible for operating television production equipment, both in the studio and in the field such as audio microphones and control boards, and /or high quality editing equipment. You will use television production equipment and perform technical functions which may include:

- Operating audio control board during productions;
- Setting up microphones including sub-systems, checking audio sources, levels, operating audio equipment and providing general assistance during all phases of pre-production and production.
- Providing editing expertise as the primary audio operator during live and post-production activities for TV and radio.
- Coordinating various audio equipment during rehearsals and live production.
- Preparing equipment and materials prior to rehearsals and maintaining and securing afterwards.
- Editing sound tracks to blend into desired productions while maintaining the appropriate sound standards.

High School diploma along with the completion of a training course at a technical school specializing in TV and radio production and prior experience operating production equipment. Ability to read, speak and write English fluently along with proficient Italian language skills. Must possess the ability to cover breaking news when it happens, work under time constraints and handle deadlines and pressure well in a calm and focused way while working with a minimum of supervision, develop, maintain and nurture relationships within a professional and working environment.
